

WHAT IS CLAIMED IS:

1. A mini stepper, comprising:

a base;

a shaft tube having a first end secured on a first end of the base; and

5 a support rack detachably mounted on a second end of the base.

2. The mini stepper in accordance with claim 1, wherein the second end of the base is formed with a fitting portion, and the support rack has a first end formed with a hollow mounting portion detachably mounted on the fitting portion of the base.

10 3. The mini stepper in accordance with claim 1, wherein the support rack has a second end formed with an extension.

4. The mini stepper in accordance with claim 3, wherein the extension of the support rack is extended outward from the mounting portion of the support rack in an oblique downward manner.

15 5. The mini stepper in accordance with claim 3, wherein the extension of the support rack is substantially V-shaped.

6. The mini stepper in accordance with claim 1, wherein the extension of the support rack is an arcuate concave body.

20 7. The mini stepper in accordance with claim 1, further comprising a support member mounted on a connection of the first end of the shaft tube and the first end of the base.

8. The mini stepper in accordance with claim 7, wherein the support member has a center formed with an arcuate mounting portion mounted on the first end of the shaft tube.

9. The mini stepper in accordance with claim 8, wherein the mounting portion of the support member has a periphery formed with two radially opposite stands.

10. The mini stepper in accordance with claim 9, wherein each of the two stands of the support member is arc-shaped.

11. The mini stepper in accordance with claim 9, wherein each of the two stands of the support member is extended outward from the mounting portion of the support member in an oblique downward manner.

12. The mini stepper in accordance with claim 1, further comprising two pedals each having a first end pivotally mounted on a second end of the shaft tube.

13. The mini stepper in accordance with claim 1, further comprising two hydraulic mechanisms each having a first end pivotally mounted on the first end of the base and a second end pivotally mounted on a second end of a respective one of the two pedals.
